

Austmont
PTY LTD

**WE CREATE
YOUR VISION**

Professional Design Services
For All Industries

If You Dream It, **We Can Create It**

Austmont's knowledge in the design, fabrication, supply, and installation of sheet metal products, commercial kitchens and bars over the past 35 years ensures that customers will get the best advice and experience in:

- ✓ Design and services drawings that will aid architects, engineers, project managers and builders
- ✓ Accurate documentation
- ✓ Budget estimations on equipment, stainless steel fabrication & installation
- ✓ Selection of the best option for new equipment
- ✓ Coordinating and providing user training to staff
- ✓ Food safety and meeting or exceeding the appropriate standards
- ✓ Understanding of unique challenges in the fabrication and installation process
- ✓ And facilitate the maintenance and longevity of the new installation

The design process is a collaborative practice between our professional staff and the client. From the initial meeting the client's needs and vision are translated into exciting reality using industry standard design software, while always checking the design meets the customer's aspirations.

No Job Is Too Big Or Too Small For Austmont

Having designed everything from hospitality, food and beverage venues, school and TAFE teaching kitchens, through to decorative sheet metal products, domestic stainless steel benches and cabinets, metal Christmas ornaments through to public rubbish bin surrounds. Years of experience and a cooperative process that works and understands the client's requirements in sketching, drawing and prototyping.

Concept, through to design and completion of the MV Epicure main kitchen

Foodservice Design

With Austmont's knowledge and in-depth expertise of commercial catering equipment, we will swiftly establish the perfect solution and kitchen design for your site with realistic proposals that fit your budget.

At Austmont we deliver on time and in budget.

Austmont continue to devise some of the most ergonomic and aesthetically designed installations that meet national standards and codes.

Design and installation is a hand-in-hand process and when you have had as much experience in fabricating and installing hospitality projects as Austmont you understand what designs work and how to overcome issues to ensure the clients vision is met.

Austmont design and manufacture a number of specialty products and systems.

Exhaust Systems

In addition to kitchens and bars we also design custom exhaust systems. Particularly useful if you have issues with:

- ✓ Low airflows
- ✓ Heritage buildings
- ✓ Needing to ventilate into public spaces
- ✓ Can't run duct work either up the outside of or through the building

We can save you thousands on base build costs

Bespoke Refrigeration

We've designed many bespoke refrigeration applications.

- ✓ Humidified Buffets
- ✓ Pastry holding units
- ✓ Chocolate displays
- ✓ Humidified ice based fish displays to name a few

Call Us With Your Dream And We'll Create It

Buffets

We are specialists in Hot and cold buffet design.

We utilise the latest induction and humidified technologies.

We can even heat through the countertop with out heating the top itself!

Safety, operational and aesthetic considerations go hand in hand with our buffet designs

Architectural and Non-hospitality

We regularly design non hospitality items.
As examples below are a smart bottle recycling system and an aged brass domestic countertop.

Let us know what you need and we'll design it

Documentation

If your design is to be tendered, Austmont can ensure that the documentation meets codes and regulations and matches the plans, so you know what is being priced is exactly what you had in mind. All documentation will follow the design, equipment list and scope of works required to bring your vision to reality.

The Team

We have specialist Designers, Draftsmen, Engineers, Chefs and Foodservice Professionals all on staff so can handle virtually any requirement in house.

Our Customer's Feedback

“

We engaged Austmont for the design of our new Aged care facility in Port Macquarie.

The project is a new build consisting of a kitchen, multiple serveries and a café.

The scope of works included consultation, concept, design, services drawings and budgets.

The Austmont team engaged with us through the process, making sure we fully understood what they were proposing and that we were able to include any of our ideas into the final design ensuring an excellent end result.

We have ended up with a 1st class design that we are more than happy with and working with a totally professional organisation like Austmont was a pleasure and I wouldn't hesitate to recommend them. ”

Mat Hafford

Director of Palmcare
